DESCRIPTORS: *Odors, Chemical properties, Physical
properties, *Molecular structure, *Sensory perception.

In some fields of perfume chemistry it is possible to set
up by analogy inference rules governing the presumable
odour of chemically related compounds; such rules allow
an approximated prediction of an odour. There are
series of chemically similar compounds where only part
of the whole complex "odour" is changed from one mem-
ber to the next. Groups having a rather characteristic
scent can even impart this specific scent to a bigger
